Triumph tells us that it had recently completed a major storage project for the administrative headquarters of the Church of England at Church House, Great Smith Street, in Westminster. Triumph's job was to supply a thoroughly modern storage solution, to a fast track programme following a decision to replace and update all existing storage in this important building. Triumph worked with Globe Office Solutions to supply and install over 600 new cabinets and 3,000 internal fittings. The storage was supplied in four different heights, with full provision for lateral filing, suspension filing, and a range of legal and accounting folders. **mix | 172**

Triumph has added three entirely new environmental standards to support its ongoing programme of continuous environmental improvement. In addition to its six existing key standards, it now belongs to ClubGreen, the UK Furniture Industry Research Association's integrated approach to environmental improvement. The storage specialist has also joined fisp – the Furniture Industry Sustainability Programme, a working group dedicated to the introduction of sustainable manufacturing and production processes at every opportunity. Furthermore, it is now part of Valpak, a non-profit organisation promoting compliance and responsible recycling solutions for packaging. **mix | 185**
