

## Triumph's recycling way to the future

**Reduce** Triumph has committed programmes in place to reduce its carbon footprint

**Reuse** Wherever possible Triumph will sell on good useable furniture to charities and community groups

**Remanufacture** Triumph use good board from desktops/cupboards to make new ranges of furniture

**Recycle** Triumph breakdown damaged products into component parts like wood/steel, then recycle

Triumph endeavour not to put any products or component parts to landfill

## Reaching for the sky Triumph rises to the carbon footprint challenge

Triumph recognises that environmental concerns are an integral part of our business activity today. We are committed to a program of continuous improvement to prevent pollution, and reduce consumption of resources generated in the course of our business

Active policies of recycling and reuse of waste are promoted wherever possible. Triumph uses UK raw materials, and combines these with a specially designed logistical and distribution system to reduce the product's carbon footprint as much as possible

# The Triumph Environmental Policy Statement

Triumph will fully comply with all legislation related to its manufacturing processes and operations, at all times

Triumph is committed to a programme of continuous environmental improvement, through a series of set objectives and targets

Triumph actively seeks to reduce and prevent pollution; and always looks for reduction in consumption of resources, and correct disposal or reuse of the waste generated, in the course of its business

Triumph policies of recycling and reuse of waste are actively promoted, wherever practicable. Triumph's chosen methods of waste disposal are those which will create the minimum of long term environmental effects

Triumph staff are formally aware of the company's environmental policy; and training is provided at all levels to ensure that the commitment to the policy is in effect throughout the company

Triumph has a system of regular annual reviews, supported by a formal environmental management system, is also in place

# Our Environmental Standards

## BSI ISO 14001

We are committed to using the most environmentally friendly processes and products in the manufacture of the office furniture, as far as is practically possible, and will continue to do so. This commitment has enabled us to achieve the environmental accreditation standard **BSI ISO 14001**

## Forest Stewardship Council

As members of the FSC, Triumph helps promote environmentally appropriate, socially beneficial, and economically viable management of the worlds forests. This aims to maintain forest biodiversity, productivity and ecological processes **TT-COC-1930**

## Furniture Industry Sustainability Programme

Developed as an industry wide working group in the furniture business, this programme specifically encourages all aspects of sustainable manufacturing and production processes, and builds in their implementation at every opportunity

## Club Green

FIRA's Club Green takes an integrated approach to the challenge of environmental improvement. It's a way of interpreting the latest legislation, and developing industry wide solutions to enhance legislated compliance and help introduce environmental management systems
