Casala

Designed by Kressel und Schelle, Parker is a comfortable and modern addition to Casala's product portfolio. The chair owes its broad range of applications to the design of its unique shell, which is designed to be compatible with 30 different frames - from star-base to cantilever and from a low lounge chair to a high bar stool. Since Parker is also offered with a high backrest, the chair is available in a total of 58 possible models. Parker can be used in a wide range of environments from conference rooms and waiting areas to restaurants.

Triumph

Fusion by Triumph is a new range of storage, lockers and orderlies. Featuring a unique combination of the strength of steel, and the look and feel of wood, Fusion is inspired by the runway and the workway. Available in different contemporary colours with practical and versatile formations to give high quality configurations, customised to your own workspace.
