efficient storage : effective spaces

The Media Centre International Headquarters, BBC Worldwide

The Client BBC Worldwide - the commercial arm of the BBC, responsible for operating a complete range of media businesses around the world

The Brief To fit out BBC Worldwide's new Media Centre over three floors in London's White City. Rectilinear floor plates had to be visually separated out into eight individual zones per floor; and colour coded as a 'way finding' tool

The Building Triumph worked with architects DEGW, and project managers Savant, to introduce

a series of colour ways which combined the requisite storage, carpet colours, furniture and graphics into one system - which could define each of the individual spaces concerned

The Storage Special adaptations of the storage items were introduced to accommodate the individual colour signatures across the full range of storage needed: from regular cupboards and filing - to specialist multimedia drawer applications for the retention of large numbers of CD's and DVD's

Triumph also supplied a specially adapted version of its **L[®]** Personal Locker Units. These were enlarged to include an integrated shelf for laptop storage below, and with a postal slot for personal mail security, above

The whole exercise confirmed Triumph's ability to integrate its storage effectively with a number of different aesthetic and organisational needs in order to fulfill an exact brief - demonstrating Triumph's complete versatility in working together with a major client and a number of professional teams

Project Scope

Title	The Media Centre
Location	White City, West London
Client	BBC Worldwide
Architects	DEGW plc
Project Manager	Savant Project Management
Furniture Supplier	Phusei Limited
Storage Supplier	Triumph
Product Ranges	L[®] Lateral Filing System with L[®] Locker units and special modifications
