efficient storage : effective spaces

Rio Tinto plc A New Headquarters Building in Paddington, London W2

The Client Rio Tinto plc, one of the world's largest mining and exploration companies in the extractive industries, with its Europe, Middle East and Africa Regional Centre in an entirely new building in London's Paddington

The Brief To match the requirements of Rio Tinto's own research-led generic furniture model

This design led approach mandated that the storage should be fully integrated within the workstations – rather than being located separately. This was regarded as vital in supporting individual and team workstyle, and preserving confidentiality

The Interior Design Project Designers, Bennett Interior Design, set out to produce a clean and crisp design aesthetic to complement the overall working approach across seven floors

The design called for the storage to integrate seamlessly with the Ergonom range of Unifor Systems Furniture, and Humanscale's Freedom task chairs

The delivery of maximum areas of work surface was also key – allowing for full sized AO maps to be spread out flat, whilst avoiding the need for desk returns

The Storage Triumph responded with its L^m Lateral Filing System, with its range of cupboards, pedestals and racking. The double door cupboard units were used throughout, with the height of the storage units being made to match exactly with the height of the desk screens

In addition, the pedestal tops were specially modified to include their own integrated docking station – so that all laptops could be moved off the surfaces to provide bigger work areas. The storage was also delivered with universally interchangeable internals, to remove the need for any bespoke solutions

Each of the pedestals also carried a special 'tether' to ensure that the new designs conformed with the relevant British Standards – both for workstation cable management, and for security. A good example of Triumph's flexible approach to product adaptation and design on issues which are central to a business

Project Scope

Title	Rio Tinto plc New Headquarters Building
Location	Paddington, London W2
Client	Rio Tinto plc
Project Design	Bennett Interior Design
Furniture Supplier	Ergonom
Storage Supplier	Triumph
Product Ranges	L ^m Lateral Filing System. Cupboards, racking and additional pedestal docking applications
